

Crystal Eyecare is proud to provide our patients with the most highly advanced technology available in retinal screening today! Our ability to view your internal retinal health is now dramatically improved with the Optomap.

We are concerned about retinal problems including macular degeneration, glaucoma, retinal holes or detachments, tumors and systemic diseases such as diabetes, stroke and high blood pressure. These conditions can lead to serious health problems including partial loss of vision or blindness, and often develop without warning and progress with no symptoms.

**EARLY DETECTION IS CRUCIAL!!**

Optomap Provides:

- An annual eye wellness scan, replacing dilation for most patients.
- An in depth view of the retinal layers (where diseases can start).
- The ability to review your Optomap retinal image during your exam.
- A permanent record for your medical file, which gives us comparisons for tracking and diagnosing potential eye disease.

Optomap:

- Is fast, easy, and comfortable.
- **May NOT require dilating drops (*which result in blurred vision and sensitivity to light*).**

Insurance typically does not cover advanced screening technologies. Because Crystal Eyecare advises ALL of our patients to have an Optomap exam, we will perform the Optomap Retinal Examination as an enhancement service for an additional fee of only \$ 39.00 for both eyes at your annual eye examination.
